Hello Christine,

The ARF that was submitted by **Ex. 4 - CBI** stated the Unvalidated data in 21 days and the final report due in 42 days. We spoke with **Ex. 4 - CBI** and let him know that we would communicate preliminary data (unvalidated) as soon as we analyzed the samples. I'll check for an update later today. Thanks and we will let you know.

Hi Kevin

I am helping Debbie at the Ames Warehouse Fire. We are grateful that the Fort Meade staff is going to run the Summa samples

Do you know what turnaround time was requested?

Thanks  
Chris
